

**Guide to Application for Judgment of Eligibility**  
**- Master's Program**  
 (Division of Advanced Science and Technology)  
 (Division of Transdisciplinary Sciences)  
 Japan Advanced Institute of Science and Technology

**I. Applicants to be screened for eligibility**

Applicants who wish to apply for the master's program under the eligibility requirement (9), (10) or (11) must be screened by JAIST prior to applying.

**[Eligibility Requirement 9]**

**Early Graduate School Entrance Program**

Applicants for the early graduate school entrance program must have completed the required number of credits set by JAIST, which is approximately three-quarters of the necessary credits to graduate from a Japanese university or an equivalent level of the curriculum in a foreign country, with excellent academic results, by the last day of the month prior to enrollment. Prospective applicants for the early graduate school entrance program are those who have:

- a) attended a Japanese university for at least three years.
- b) completed a 15-year curriculum of school education in countries other than Japan.
- c) completed a 15-year curriculum of school education in a foreign country by completing the correspondence curriculum of an overseas educational institution while residing in Japan.
- d) completed a curriculum at a foreign-affiliated university in Japan which has a university curriculum under the school education of its country (Its completion must be regarded as the completion of a 15-year curriculum of school education in its country) and specifically designated by the Minister of Education, Culture, Sports, Science and Technology.

Please note with great caution that if an applicant enrolls in JAIST under the eligibility requirement (9) a), they will leave their university prior to graduation. In this case, they will not be eligible for some Japanese national examinations requiring that applicants have graduated from a university and obtained a bachelor's degree.

**[Eligibility Requirement 10]**

Eligible applicants are those who have enrolled in a graduate school as stipulated in Paragraph 2, Article 102 of the School Education Act, and recognized as having sufficient academic abilities by JAIST. (e.g. Applicants who have enrolled in other graduate school under the eligibility requirement equivalent of eligibility requirement (9) set by JAIST and wish to enroll in JAIST.)

**[Eligibility Requirement 11]**

Eligible applicants are those who have been recognized by JAIST through the Judgment of Eligibility as having an equivalent or greater scholastic ability than that of university graduates, and have reached 22 years of age.

Specifically, eligible applicants are those who have graduated from a junior college, vocational college, or branch school in Japan of a foreign university etc. (In short, those who do not hold a bachelor's degree), and have been recognized by JAIST as having particular ability in their field of specialization. JAIST will judge applicants on their academic papers, patents, and relevant documents which demonstrate experience in business or international activities, together with the other documents provided.

**II. Application Documents**
