<b>1</b>	<b>Introduction</b>	<b>1</b>
1.1	Background and Motivation . . . . .	1
1.2	Auctions as a Gateway to Understanding Economic Games: Exploring Irrational Behaviors . . . . .	8
1.2.1	Theoretical Frameworks in Auctions . . . . .	9
1.2.2	Psychological and Social Dimensions of Auctions . . . . .	9
1.3	Problem Statement . . . . .	9
1.4	Theoretical Foundations . . . . .	10
1.4.1	Game Refinement Theory and Motion in Mind Framework . . . . .	10
1.4.2	Game Theory and Auctions . . . . .	11
1.4.3	Auction Evolution as a Strategic Model . . . . .	11
1.4.4	Game Utility and Non-Economic Utility in Auctions . . . . .	12
1.4.5	Core Hypotheses . . . . .	12
1.4.6	Theoretical Expansion . . . . .	13
1.5	Auction Systems and Algorithms . . . . .	13
1.6	Research Objectives and Significance . . . . .	14
1.7	Structure of the Dissertation . . . . .	15
1.7.1	Chapter 1: Introduction . . . . .	15
1.7.2	Chapter 2: Literature Review and Proposed Theory . . . . .	16

1.7.3	Chapter 3: Auction System and Motion in Mind . . . . .	17
1.7.4	Chapter 4: Strategic Selection and Design of the First Auction Item: Analyzing Auction Dynamics through “Motion in Mind” and “Potential Reinforcement Energy” . . . . .	18
1.7.5	Chapter 5: Enhancing Auction Experiences: Game Dynamics and customer experience (CX) Design . . . . .	19
1.7.6	Chapter 6: Rational Bidding Meets Emotional Viewing: The Landscape of English Auction Livestreams in the Age of Algo- rithms . . . . .	20
1.7.7	Chapter 7: Conclusion . . . . .	21
1.8	Chapter Conclusion . . . . .	21
<b>2</b>	<b>Literature Review and Proposed Theory</b>	<b>23</b>
2.1	Chapter Introduction . . . . .	23
2.1.1	Chapter Structure . . . . .	24
2.2	Game Theory and Game Refinement Theory (GR Theory) . . . . .	27
2.2.1	Game Theory . . . . .	27
2.2.2	Game Refinement theory . . . . .	30
2.3	Economic Literature Review . . . . .	35
2.3.1	The Dual Nature of Auctions: Convergence of Serious and Leisure Economics and Games . . . . .	36
2.4	Game Utility and Non-Economic Game Utility . . . . .	38
2.4.1	Utility Theory and Uncertainty: From Classical Utility to Game Utility . . . . .	38
2.4.2	Quantifying Non-Economic Game Utility . . . . .	41
2.5	Auction . . . . .	46
2.5.1	Auction Theory and its Development . . . . .	47
2.5.2	Characteristics of Auctions . . . . .	47
2.5.3	Auction Rules and Fundamental Concepts . . . . .	50
2.5.4	Auction Types and Strategic Variations . . . . .	52

2.5.5	Connecting Auction Characteristics to Research Objectives . . .	53
2.6	Modeling Auctions Using Game Refinement Theory . . . . .	54
2.6.1	Auction System and its Analysis for Participant’s Perspective	55
2.6.2	Model for Observer’s Perspective . . . . .	64
2.6.3	Analysis of English Auctions for Observer’s Perspective . . . .	66
2.7	Chapter Summary . . . . .	68
<b>3</b>	<b>Beyond Economic Incentives: Deconstructing the Multidimensional Motivations in Auction Behavior via Motion in Mind</b>	<b>71</b>
3.1	Chapter Introduction . . . . .	71
3.2	Information, Uncertainty, and Reward . . . . .	73
3.2.1	Free Fall Motion in Mind . . . . .	75
3.2.2	Engagement Measure by Balancing Potential Reinforcement Energy ( <i>PRE</i> ) and Magnitude of Extraordinary Experience ( <i>MEE</i> ) . . . . .	77
3.3	Auction System and its Analysis . . . . .	78
3.4	Result Analysis and Discussions . . . . .	80
3.4.1	Experimental Design . . . . .	80
3.4.2	Velocity Analysis of English Auctions . . . . .	81
3.4.3	In-depth Analysis of Initial and Final Auction Estimates . . .	91
3.4.4	Potential Extraordinary Engagement <i>PEE</i> – Balance between <i>PRE</i> and <i>MEE</i> . . . . .	94
3.5	Chapter Conclusion . . . . .	96
<b>4</b>	<b>Strategic Selection and Design of the First Auction Item: Analyz- ing Auction Dynamics through “Motion in Mind” and “Potential Reinforcement Energy”</b>	<b>98</b>
4.1	Chapter Introduction . . . . .	98
4.2	Information, Uncertainty, and Reward . . . . .	100
4.2.1	Cognitive Dynamics in Games . . . . .	101
4.2.2	Applying Game Dynamics to Auction Analysis . . . . .	103

4.2.3	Analytical Framework for Auction Dynamics . . . . .	103
4.3	Methodology . . . . .	105
4.4	Results . . . . .	105
4.4.1	Game Analysis . . . . .	106
4.4.2	Understanding the Motivations and Addiction Mechanisms Behind the $m$ value in Auctions . . . . .	108
4.4.3	Impact of Auction Pricing Strategies . . . . .	109
4.4.4	Lure Bidding Model: Strategic Insights for Auction Design . . . . .	111
4.5	Discussion . . . . .	113
4.6	Implications for Auction Design . . . . .	113
4.7	Chapter Conclusion . . . . .	115
<b>5</b>	<b>Enhancing Auction Experiences: Game Dynamics and Customer Experience Design</b> . . . . .	<b>117</b>
5.1	Chapter Introduction . . . . .	117
5.2	Theories of Customer Experience in Commercial Behavior . . . . .	121
5.2.1	Serial Position Effect . . . . .	121
5.2.2	Peak-End Rule . . . . .	122
5.3	Motion in Mind Model . . . . .	123
5.3.1	Principle Review . . . . .	123
5.3.2	Modeling in Auction . . . . .	124
5.3.3	From Physical Models to Auction Modeling . . . . .	126
5.3.4	Computational Modeling . . . . .	131
5.3.5	Experiment Design and Data Collection . . . . .	134
5.4	Research Innovations in Economic Games . . . . .	134
5.4.1	Systematic Framework for Analyzing Complex Economic Behavior . . . . .	134
5.4.2	Quantitative Modeling of Non-Economic Utility . . . . .	134
5.4.3	Audience Effects as a Quantifiable Behavioral Factor . . . . .	135
5.5	Analysis of the Starting Point in Auction Bidding ( $I$ value Analysis) . . . . .	135

5.5.1	$I < E_L$ . . . . .	136
5.5.2	$I > E_L$ . . . . .	136
5.5.3	Analysis of the Positions of $I$ , $F$ and Auction Estimates . . . . .	140
5.6	Results and Discussion . . . . .	143
5.6.1	Estimation of the Gravitational Constant . . . . .	143
5.6.2	Consistency across Different Auctions . . . . .	145
5.6.3	Comparative Analysis of Auctions to Other Games . . . . .	149
5.6.4	Bidder Decision Dynamics Model . . . . .	152
5.7	Chapter Conclusion . . . . .	153

<b>C A Review of Auction Theory</b>	<b>217</b>
C.1 Introduction . . . . .	217
C.2 Differences Between Auctions . . . . .	218
C.2.1 Different Auction Types . . . . .	218
C.2.2 Connecting Auction Characteristics to Research Objectives . . . . .	221
C.3 Auction Theory . . . . .	222
C.4 Development and Improvements in Auction Theory . . . . .	224
C.5 Other Related Research . . . . .	225

C.6 Conclusion . . . . . 226

# List of Figures

2-1	An illustration of the process of solving the uncertainty of the outcome of a thing: straight line and gravity-in-mind curve. . . . .	33
2-2	An illustration of potential reinforcement energy (PRE) and magnitude of extraordinary experience (MEE) [1]. . . . .	34
2-3	Components of total utility in a game . . . . .	42
2-4	Components of Total Game Utility ( $U$ ) with Economic ( $E$ ) and Non-Economic ( $N$ ) Utility, Assuming $\delta = 0$ and $\epsilon = 0$ . . . . .	43
2-5	The Three-Body Problem. <sup>1</sup> . . . . .	59
2-6	The Restricted Three-Body Problem. <sup>2</sup> . . . . .	60
2-7	Diagram of strategic choices and exit timing in the auction process. <sup>3</sup> .	70
3-1	An illustration of the process of solving uncertainty of the outcome of a thing: straight line and gravity-in-mind curve. . . . .	76
3-2	An illustration of potential reinforcement energy ( $PRE$ ) and magnitude of extraordinary experience ( $MEE$ ) [1] . . . . .	77
3-3	The comparison of (a) segment 1, (b) segment 2, (c) segment 3, and (d) segment 4 in spring auction 2021 . . . . .	82
3-4	The comparison of (a) segment 1, (b) segment 2, (c) segment 3, and (d) segment 4 in autumn 2021 . . . . .	83
3-5	The comparison of (a) segment 1, (b) segment 2, (c) segment 3, and (d) segment 4 in spring auction 2022 . . . . .	84
3-6	The comparison of (a) segment 1, (b) segment 2, (c) segment 3, and (d) segment 4 in autumn 2021 . . . . .	84

3-7	The comparison of (a) segment 1, (b) segment 2, (c) segment 3, and (d) segment 4 in spring auction 2022 . . . . .	85
3-8	The comparison of (a) segment 1, (b) segment 2, (c) segment 3, (d) segment 4(a), and (e) segment 4(b) in autumn 2021 . . . . .	86
3-9	Cumulative price deviation ( $\Delta$ ) versus auction velocity ( $v$ ) across segments of 2023 auction . . . . .	89
3-10	The comparison of (a) auction velocity and (b) price deviation against distribution curves. Meanwhile, (c) $a$ value and (d) $j$ value versus price deviation . . . . .	89
3-11	Auction dynamics based on the positioning of $I$ , $F$ , $E_L$ , and $E_U$ values	92
3-12	The ratio of initial price ( $I$ ) to the lower limit of estimates ( $E_L$ ) . . . . .	94
4-1	An illustration of the process of solving uncertainty of the outcome of a thing: straight line and gravity-in-mind curve. . . . .	102
4-2	An illustration of potential reinforcement energy ( $PRE$ ) and magnitude of extraordinary experience ( $MEE$ ) . . . . .	103
4-3	Comparison of $m$ value: First Lot vs Average for One Auction . . . . .	107
4-4	Comparison of $v$ value: Average vs First Lot for One Auction . . . . .	107
4-5	Comparison of $N$ Values: First Lot vs Average for One Auction . . . . .	108
5-1	The Three-Body Problem. <sup>4</sup> . . . . .	126
5-2	The Restricted Three-Body Problem. <sup>5</sup> . . . . .	126
5-3	Comparison of $I$ value and $E$ value lower limit . . . . .	136
5-4	The situation of $N$ value when $I < E$ . . . . .	137
5-5	$N$ values when $I \leq E$ . . . . .	137
5-6	Auction dynamics based on the positioning of $I$ , $F$ , $E_L$ , and $E_U$ values	140
5-7	The ratio of $I$ value to the lower limit of Estimate . . . . .	142
5-8	Christie 20th/21st century Auctions 2023: Hong Kong (a), London (b), and New York (c) . . . . .	146
5-9	Sotheby Now or Modern Auctions 2023: Hong Kong(a), London(b), and New York(c) . . . . .	146

5-10	Sotheby Contemporary Auctions 2023: Hong Kong(a), London(b), and New York(c) . . . . .	147
5-11	The dynamics of velocity from the Dutch auction Grade C . . . . .	148
6-1	Monitoring the Auction Process in a High-Tech Control Room. <sup>6</sup> . . . .	159
6-2	Diagram of Strategic Choices and Exit Timing in the Auction Process. <sup>7</sup>	164
C-1	Auction Types. <sup>8</sup> . . . . .	219

# List of Tables

2.1	Comparison of variable applications between traditional game theory and observer’s perspective for English auction analysis . . . . .	67
3.1	An example data of five sessions in an auction system . . . . .	80
3.2	Statistical data of several auctions with some number of sessions (English auction system for Christies Hong Kong) . . . . .	81
3.3	Statistical data of several auctions with number of sessions (English auction system for Christies and Sotheby) . . . . .	81
3.4	Detailed summary of the 2021 spring and autumn auctions . . . . .	82
3.5	Detailed summary of the 2022 spring and autumn auctions . . . . .	83
3.6	Detailed summary of the 2023 spring and autumn auctions . . . . .	85
3.7	Auction estimate cases . . . . .	93
4.1	Comparison of the First Lot of the Auction vs. Average Data . . . . .	106
4.2	Game Analysis . . . . .	109
4.3	Auction Data . . . . .	110
5.1	$N$ Values When $I \leq E$ for Christie & Sotheby . . . . .	138
5.2	Importance Scores of Auction Items Based on Promotional Efforts . . . . .	144
5.3	Summary of Gravitational Constants across Auctions . . . . .	145
5.4	Various analysis of games using $v$ and $m$ compared to auction . . . . .	151
6.1	Measures of $GR$ and $AD$ for popular board games [2] [3] . . . . .	161
6.2	Comparison of Variable Applications between Traditional Game Theory and English Auction Analysis . . . . .	163

6.3 Auction simulation data with different bidder levels . . . . . 175

6.4 Optimal Number of Participants for Different Bidder Levels under Specific Conditions . . . . . 175
